What is eLecta Live®?

eLecta Live is a live virtual classroom and real time online collaboration environment designed for teaching and training over the Internet.

With eLecta Live you can arrange live classes, lectures, online meetings, group sessions, individual one-on-one sessions and webinars – all taking place over the web in real time.

For your live sessions you only need a computer with an internet connection.

Top Ten Ways of Using eLecta Live

The possibilities are almost endless, with users only limited by their imaginations. Some of the most common applications of eLecta Live are:

1. Live Instruction

Traditional distance learning programs have low completion rates as students are left to learn on their own with a feeling of isolation. Today's online teachers need a method to communicate to students in an effective and pedagogically sound manner, one-on-one or one-to-many. Studies show that the ideal solution is a blended learning model with asynchronous and synchronous interaction.

2. Meetings

With **eLecta Live**, you can easily and effectively host web based meetings, significantly reducing teleconferencing and travel costs and decreasing time away from job. Teachers and administrators save significant amounts per year by not having to travel long distances for meetings and professional development. And this doesn't take into effect the elimination of the cost of substitute teachers for those on the road.

3. Asynchronous Content Development

With **eLecta Live**, you can create asynchronous content using the interactive record and playback functionality. For example, you can record student orientation sessions or add a recorded welcome to your virtual classroom prior the first day of class. In addition, students can view interactive recordings of your classes if they've missed a session or just to reinforce learning and help retain knowledge.

4. Tutoring Programs

Whether provided by instructors or peers, tutoring via eLecta Live offers students an opportunity to work one-on-one to get questions answered or receive help with homework or other assignments. Sessions can be scheduled, or students can drop into to an existing virtual room to connect with the tutor.

5. Classroom Collaboration

Collaboration at a distance connects students from different locations and cultures to enhance the learning experience. Students from United Kingdom collaborated with students from China in a course about international architecture.

6. Virtual Office Hours

Teachers can extend the hours they are available to their students with eLecta Live virtual office hours. Meet one-on-one or with groups of students.

7. Student/Parent Orientation

Want to expand your geographical reach and attract more students? Showcase your programs for prospective students and their parents online with eLecta Live. You can also conduct orientation for new students and even record the sessions for those who couldn't attend in person.

8. Remote Guest Speakers

Online education is all about creating engaging learning environments. **eLecta Live** enables you to bring in remote experts to the classroom or send students on a virtual field trip.

9. Professional development

Attract and retain qualified instructors and staff by providing cost-effective, ongoing professional development via **eLecta Live**. Connect teachers on a campus-wide level to share best practices. Offer real-time or recorded training sessions for applications, tools, and administrative systems.

10. Virtual Help Desk

Need additional methods to provide support and immediate assistance to students, faculty, and staff? With eLecta Live students can get access to the resources, such as the research library, without coming to campus.

Virtual Classroom Tools and
Features at a Glance

Collaboration Tools and Features at a Glance

Each eLecta Live virtual classroom is equipped with multiple interactive whiteboards, crystal clear audio, rich markup and annotation tools, file and document sharing tools for running synchronized presentations, screen sharing facility for computer based training and remote desktop sessions.

Crystal Clear Full Duplex Audio

Integrated Audio Conferencing. Multiple Speakers. High Quality Voice Over IP (VoIP) even on lower bandwidths. No conference calls. No additional charges for audio conferencing.

PowerPoint, File and Image Broadcasting

Run your PowerPoint files with markup and annotation. Launch files and broadcast images synchronously.

Shared Interactive Whiteboards

Multiple shared whiteboards. Type text, launch images and slides. Full digital tablet support for handwriting or precise drawing.

Rich Markup and Annotation Tools

Rich markup and annotation tools on the whiteboards over images and slides. Use pointers and checkers to focus your attendees' attention.

Share Your Screen and Applications

Enhance your computer based training classes sharing your entire screen or just a single application. Give remote control to students and attendees.

Session Recording and Playback

Record your live sessions and meetings for quality control or archiving. Publish your recordings on your website to attract new students or give individual playback permissions.

Live Video Sessions

Enhance your team meetings and group discussions with live video conferencing even on lower bandwidths.

Guided Web Tours

Many resources are located on web sites on the Internet. Take your audience to a web page - all together at once. Navigate safely and securely.

Arrange Online Polls and Surveys

In a virtual classroom the online polling feature is a must. Arrange online polls with predefined answers.

Breakout Rooms for Individual Collaboration

With the eLecta Live Breakout rooms you can split your class into smaller groups so that your students collaborate and practice individually.

Instant Messaging and Session Comments

Instant messaging / text chat is available for communication along with the audio. The session leaders can enable/disable the text messaging options.

Learn the basics of how eLecta Live works.

How does eLecta Live Work?

Well, it's simple. With just three words describing the process – Schedule, Invite, Attend...

Fully Managed and Hosted

All eLecta Live products and services are **fully managed and hosted**, which means that you do not have to take care about servers, installations, hosting, setting up etc. It's our job. You focus entirely on your business while we take care of technology.

Schedule, Invite, Attend ...

When you sign up for one of the **eLecta Live editions** you receive a fully functional ready to go training center on the Internet with a custom URL and admin username and password. Then you are ready to start your online activities.

Under your eLecta Live hosted account you will find advanced scheduling tools for managing the access to your live classes and conferences. You can schedule live classes and sessions, start online meetings on the fly and invite attendees and students to join.

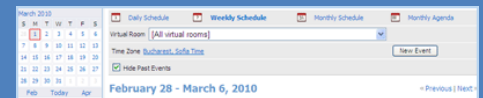

Advanced Management Tools*

With the student and teacher management tools you can keep a record of all your students and teachers without losing any one. Your students and teachers have password protected individual profiles with personalized or group class schedule and access permissions.

With just a few clicks you can create new virtual classrooms, assign moderators, manage the access to resources giving individual or group access permissions.

* Some of the options are not be available in all eLecta Live products. See the Product Family and the Product Comparison Sections for exact functional specification.

Our State of The Art Data Centers are located in the United States with excellent connectivity towards any world location.

Complete Set of Collaboration Tools	✓	✓	✓	✓
Management and Scheduling Tools	✓	✓	✓	✓
Student Account Management		✓	✓	✓
Teacher management and Administrators			✓	✓
Simultaneous Live Classes. Unlimited classrooms				✓

¹ The “Per Seat” licensing is a flexible model in which each class attendee (student or a teacher) needs a seat to attend a live session. You may have any number of students and teachers on record. The capacity of your class depends only on the number of seats you have. All seats are reusable and may be occupied by different students in different classes. **For example** if your virtual school has 200 students on record but you only need to hold two overlapping classes at the same time with 20 students in each class then you would need 2x20 seats in order to accommodate your student.

² **eLecta Live Easy Meetings** is licensed “per host” and is available in two different seat configurations – for up to 20 and up to 50 attendees so that each host may have up to 20 (up to 50) people in a live session. These can be different people each time. The name of the host may not be changed.

² **eLecta Live Tutor** is licensed “per teacher”. It is available in two different seat configurations – for up to 5 and up to 20 attendees so that each teacher may have up to 5 (up to 20) students in a live session. These can be different students each time. The name of the teacher cannot be changed.

HOW TO GET YOUR ELECTA

You can purchase eLecta Live online on our web site www.e-lecta.com. Contact our consultants to help you choose the right solution for your organization.

IF YOU STILL ASK
WHY CHOOSE ELECTA LIVE

Why Choose eLecta Live for Your Organization

Well, for us this has always been the easiest question to answer.

eLecta Live is especially designed for the area of education

Unlike other “competitive” solutions originally designed for either live chat or just screen sharing and later partially adapted to the teaching and learning area **eLecta Live by its origin was planned, designed and built entirely to serve the educational area.** It’s not just a screen sharing tool which you try to use for a serious online educational process.

During all our years of experience and development we have been focused on the specifics of the teaching and learning process which differ quite a lot from the pure web conferencing activities.

It is Adaptive, Flexible and Cost Effective

eLecta Live is flexible enough to fit to your specific model. You do not need to change anything on your side to get started working with eLecta Live.

Our pricing models and packages have been carefully designed so that you get the best possible value for your money without exceeding the budget of your organization.

eLecta Live has been proven to be an “easy to start” and “easy to use” service. Students and teachers from different parts of the world, speaking different languages use **eLecta Live** in their daily activities without having any special technical knowledge.

What does “managed and hosted” mean for us?

Just as each of your students is unique for you – each of our customers is unique for us.

We know that each customer has specifics. We work close with all of our customers going far beyond the standard level of understanding and support which usually stands behind “managed and hosted service”.

“I would like to express my deepest appreciation for all the efforts you have made on my behalf. If your software is just the tenth of the excellent service, diligence and care you show to your customers, then I am certain to have the best tool that will enable me to give the same high-quality service to my students! Words cannot express enough how impressed I am!”

Denis Lacelle, Speak 2 Denis, Canada

WANT TO KNOW MORE?

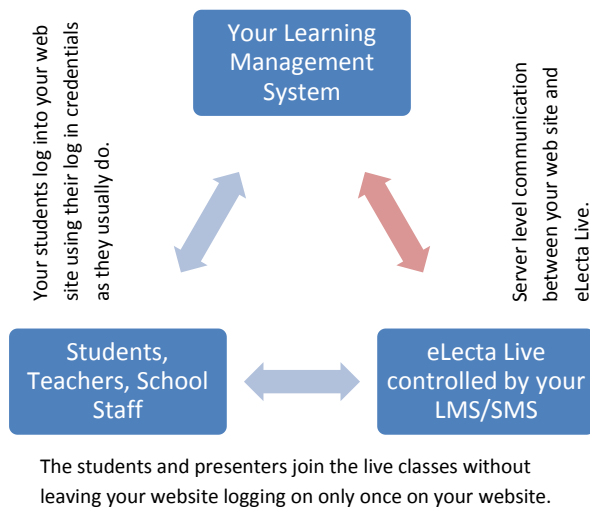

See how you can link eLecta Live to your LMS or your school web portal.

Integrate eLecta Live with Your Website

With the eLecta Live open integration API you can link your virtual classroom to your existing Learning Management System (SMS) or Student/Class Management System (SCMS).

Integrating eLecta Live into your LMS you can enable your students and instructors to access the live virtual classes directly from your website with one single authentication procedure – on your web site.

It's Universal

The eLecta Live Open Integration API contains a set of scripts, html forms and asp calls which you call from your web site to get control over the virtual rooms. You can use the API virtually with any LMS/SMS currently on market.

With the universal API you can achieve the highest level of integration between your asynchronous web based solution and eLecta Live. Your virtual classrooms will be accessible through your own scheduling system and **eLecta Live** can work with your student database.

Advanced Yet Easy to Use

The API has been designed to offer several levels of complexity depending on how much control you want to gain over eLecta Live. Without any special knowledge you can easily do with just publishing a simple HTML form on your site or you can choose to have advanced server-to-server communication through the API.

Moodle Activity Module and Blocks

Your **eLecta Live** virtual rooms are ready to work with one of the most popular open source learning management systems – Moodle. With the **eLecta Live Moodle Activity Module** you can add live classes and session activities to your Moodle courses or give open classroom access using the **eLecta Live Moodle Block**.

What if you have unique requirements?

Well, then we have a unique approach. Contact us today to discuss your specifics with a solution specialist.
