

SYSTEM REQUIREMENTS for attending eLecta Live Sessions

Version 6.1

Operating System

Windows XP Home, XP Pro,
Windows 2000,
Windows 2003,
Windows Vista (all editions)

Web Browser

Internet Explorer
Mozilla Firefox
Opera, Netscape, Google Chrome
(*Java from Sun Microsystems must be installed*)

Hardware Requirements

CPU: **266 MHz Pentium II or Higher**
Recommended: **1 GHz Pentium III or higher**
RAM: min 256 MB,
Recommended: **512 MB** or above

Data Storage

HDD: **min 20 MB disk free space**
Required disk space may increase within the session. Keep up 100 MB disk free space.

Other software requirements

Usually eLecta does not require other programs be installed on your system. Sometimes, however, you may need to install a specific audio/video codec if experiencing audio problems or unable to participate in a videoconference. In this case the system will inform you about the problem.

Network and Bandwidth Requirements

Connectivity

The participant computer must be connected to the Internet.

Min connection type is a dial-up connection with at least 56 kbps bandwidth.

Recommended connection type is ADSL or LAN.

Firewall Settings

eLecta usually has no problems with firewalls while connecting to an online session.

If you are located behind a proxy you may need to ask you system administrator to allow access to specific host/port if you are experiencing connection problems.

Bandwidth Saving

We recommend slow connection users to avoid multitasking while in a live session.

If you are running on a slow Internet connection, please avoid activities consuming bandwidth when in a live session.

Presenters are required to have a microphone installed.

In case of a videoconference you must have a video camera installed and configured. Please refer to the specific device documentation.

For best whiteboard performance we recommend using a digital tablet or other pointing device. It will enable you to do free handwriting. eLecta Live supports almost all of the digital tablets selling today.

PowerPoint presentations do not require PowerPoint be installed on participants' computers. Presenters need PowerPoint as long as the slide show is uploaded.
