

Upload and Run Presentations (Video Tutorial)

This video tutorial shows how to upload presentations in the Presentations Library of the virtual classroom and how to run the presentations on the whiteboard.

You can share PowerPoint (PPT, PPTX) files, PDF, Word, Excel, Text files and all printable document formats.

Mac Os users must first save the respective file as a PDF and upload the PDF version. iOS (iPad and iPhone) moderators can also upload from the respective mobile device but need to have a link to the file as iOS devices do not allow uploading local files to applications.
