

Can I use a digital tablet or other pointing devices in my live session?

Sometimes your live online tutorials and classes may require plenty of handwriting and drawing. In this case it is reasonable to use a digital pen or a digital tablet (writing pad) attached to your computer.

Handwriting with such a device is easy and Electa Live provides a handwriting tool on its whiteboard toolbox.

The screenshot shows a digital whiteboard interface with a toolbar on the left and a workspace on the right. The workspace contains handwritten text and a diagram. The text is written in purple ink and reads:

$$\triangle ABC, \overline{AM} \text{ median}$$
$$\Rightarrow [AMB] = \frac{1}{2}[ABC] = 24$$
$$\triangle AMB, \overline{MN}, \overline{BP} \text{ medians}$$
$$\Downarrow$$
$$G \text{ centroid of } \triangle AMB$$
$$\Downarrow$$
$$[MGP] = \frac{1}{6}[AMB] = \frac{1}{6}(24) = \boxed{4}$$

The diagram on the right shows a triangle ABC with vertices A , B , and C . A median AM is drawn from vertex A to the midpoint M of side BC . The area of triangle AMB is labeled as 24. Inside triangle AMB , two medians MN and BP are drawn, intersecting at the centroid G . The area of the small triangle MGP is labeled as 4. A pink line segment AG is also drawn, extending from vertex A through the centroid G to the midpoint N of side MB .

You may consider any such device that is compatible with your computer. It is just a matter of preference to choose one.

Alternatively, you may use an iPad/iPhone device or any touch-screen computer for finger writing on the screen surface.

Can I use a digital tablet or other pointing devices in my live session?
