API 3.0 - Session Logs

This API call returns the session log entries for a time frame, for a selected virtual classroom or user.

Username - String, Optional, Sample: johnsmith

The username of the user whose logs will be displayed

The above three parameters are not required but at least one has to be present.

Sample Call

https://api30.school-network.net/logs/?cid=12345&token=29f4c40b-7de5-4594-afc4-abd07128913d&Star

Sample Result

```
        <AccessLevel>ADM</AccessLevel>
      </Item>
      <Item>
        <UserId>219418</UserId>
        <ExternaName/>
        <RoomID>1000</RoomID>
        <DisplayName>Daniel Miller</DisplayName>
        <UTCIn>1/18/2016 8:19 PM</UTCIn>
        <UTCOut>1/18/2016 8:25 PM</UTCOut>
        <IPAddress>xxx.xxx.128.11</IPAddress>
        <AccessLevel>ADM</AccessLevel>
      </Item>
   </Items>
</Logs>
```

Results Explained

UserId - the internal numeric user id of the attendee

ExternalName - username of the attendee if created by an API call to the Direct Classroom Namespace

RoomId - the numeric Id of the virtual classroom

DisplayName - the name of the user as viewed during the live session

UTCIn, UTCOut - the date and time of the entry/exit in UTC. If UTCOut is empty then the user is still in session.

IPAddress - the network IPv4 address of the user

AccessLevel - the access level of the user in the session. ADM stay for administrator, STD stays for Student and MDR stays for Moderator.
