

Managing Question Banks

A question bank is similar to your resource library. It is where you can store any questions that you may wish to use for any of your quizzes. The questions residing in the question bank can be reused as many times as you wish as they are permanently saved. Questions within the question bank can also be grouped based on any criteria that best suits you (e.g. a history group where you can add any history questions).

How To Add Questions To The Quiz Bank

Click onto **Resources > Quiz Question Bank > Create.**

The screenshot displays the 'Questions Bank' interface. At the top, there is a header with a question mark icon, the text 'Questions Bank', and a subtitle 'Build quiz question bank and use in quizzes'. On the right side of the header, there are navigation links for 'Home' and 'Resource Library'. Below the header, there is a toolbar with a '+ Create' button, a 'Delete' button, and a search bar labeled 'Search for...'. The main content area is divided into two sections: 'Questions in Group' and 'Question Groups'. The 'Questions in Group' section contains a table with columns for 'Question', 'Answer Type', and 'Points'. The 'Question Groups' section on the right shows a list of groups, including 'History (Y10-HIS)' and 'Computer Science (Y11-CS)'. A tooltip 'Create new question' is visible over the '+ Create' button.

Question	Answer Type	Points
<input type="checkbox"/> convert 1110010101 to denary	Open Question	5
<input type="checkbox"/> convert 127 to binary	Open Question	5
<input type="checkbox"/> convert 17 to binary	Open Question	5
<input type="checkbox"/> convert 10000101010 to denary	Open Question	5
<input type="checkbox"/> Describe the FDE (fetch-decode-execute) cycle	Open Question	10
<input type="checkbox"/> The first human life to set foot in North America is most likely from...	Select One	10
<input type="checkbox"/> which historical event took place in 1982, Decemeber 3rd fdssd	Open Question	10

Questions created specifically for the question bank have the same attributes as regular quiz questions. They are created and saved in the same way, apart from the option here which allows you to assign the newly created question to a specific question group. When creating the question, you can select which group the question should automatically be added to.

Grouping Questions

Questions residing in the quiz bank can be grouped based on their topic or any other criteria. This allows for easy organization as you can choose which question belongs in which group.

How to create groups:

Click onto the "**Add New Group**" button on the right-hand side of the screen.

Groups consist of an Id and a name by which you can find the group later.

Adding Questions From Existent Quizzes

Questions from already created quizzes can also be added to the question bank.

To do so click onto **Resources > Assignments, Homework & Quizzes** and then onto the red settings button next to the quiz which you would like to take the specific question from.

<input type="checkbox"/>	Id	Task / Quiz Title	Available After	Due Date	Created by	Status	Max Points

Add to Question Bank

Managing Question Banks

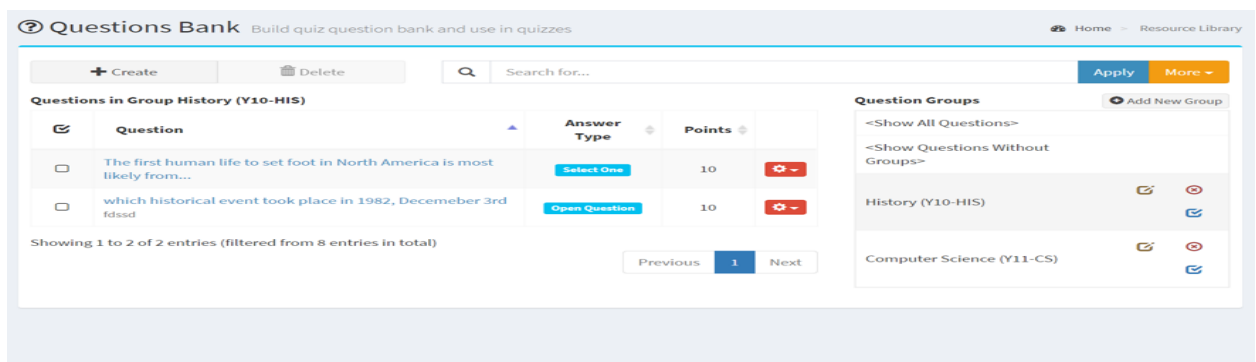

This will take you to a pop up screen which allows you to choose which group to add the question to.

Permissions

You can set permissions as to who can access which question bank group as for example a mathematics teacher would not need access to any biology questions.

To set access permissions click onto the small blue icon next to whichever group you would like to set permissions for.

Managing Question Banks

Available to all teachers - when this option is selected, it allows all teachers to have access to the specific group.

If only specific teachers should have access to this group, unselect the available to all option. This would provide you with the option to select one (or multiple) teachers to access the questions.

Question Group Permissions : History (Y10-HIS)

Available to all trainers

User Groups Permissions

Similarly students studying science may not need access to the art quizzes. Therefore you can also set user group permissions.

Click onto the blue **"Add User Group"** button and select the appropriate user group. To create user profiles and user groups follow this tutorial: [Setup and Manage Student Profiles](#)
